### PERSONAL SKILLS

AGILE

ORGANIZATION

COMMUNICATION

UX DESIGN

## OBJECTIVE AND PROFILE

Full stack developer seeking an internship that would benefit me and a company with the technical skills I have accumulated. Dedicated to join a team that is excited to try innovative ideas and further implement improvements for the company. I'm a quick learner and my passion for learning never stops.

## BEST PRACTICES

Object Oriented Programmig  
Agile Methodology

Test-Driven Development  
Thinkful Programming

## SKILLS

### LANGUAGES

JavaScript  
Java

### DATABASES

PostgreSQL  
MongoDB

### TOOLS

HTML  
CSS  
Jade  
Git  
Gulp  
SASS  
LESS  
NodeJS

### GRAPHICS

Photoshop  
Illustrator  
Balsamiq  
PowerPoint

### FRAMEWORKS

AngularJS  
ExpressJS  
Bootstrap

### LIBRARIES

jQuery  
Mongoose  
Bookshelf.js  
Jasmine

## PROJECTS

### WHAT THE TRELL

OCT. 2015 - NOV 2015

What The Trell is a clone of a well known online todo app called Trello. I used the MEAN stack(MongoDB, ExpressJS, AngularJS, and, NodeJS) to develop a fullstack application. The user can create an account and build multiple boards. Each board can contain many lists with items. The user can also make changes or remove any of the boards, lists, and items.

### EGGERCISE

SEP. 2015 - CURRENT

Eggercise is an exercise tracking/betting app where users can create groups and compete with other users involving a pool of money. That pool of money goes to the user that exercises the most within the group.

I created most of the app's basic functionality (i.e. deleting, editing, and showing data). I also wrote media queries for the app to appear responsive on different devices.

## EDUCATION

### LEARNTECH LABS

SEP. 2015 - CURRENT

LearnTech Labs teaches modern web and app development alongside computer science fundamentals. Students code for more than 1,500 hours on projects provided by industry developers. By combining these practical coding skills with computer science fundamentals; LTL Junior developers come out with a balanced skill set that allows them to dive into industry work with class.
