OBJECTIVE AND PROFILE

Full stack developer, interested in seeking an internship that would benefit a company with the technical skills I have accumulated. Dedicated to join a part of a team that is excited to try innovative ideas and further implement improvements for the company. I'm a quick learner and my passion for learning never stops.

BEST PRACTICES

Object Oriented Programming
Agile Methodologies

Test Driven Development
Thinkful Programming

SKILLS

LANGUAGES	DATABASES	TOOLS	GRAPHICS
JavaScript	PostgreSQL	HTML	Photoshop
Java	MongoDB	CSS	Illustrator
		Jade	Layout Design
		Git	Balsamic Mockups
FRAMEWORKS	LIBRARIES		
NodeJS	jQuery	Gulp	
AngularJS	Mongoose	SASS	
ExpressJS	Jasmine	LESS	
Bootstrap		Bookshelf.js	

PROJECTS

WHAT THE TRELL

OCT. 2015 - NOV 2015

What The Trell is a clone of a well known online todo app called Trello. I used the MEAN(MongoDB, ExpressJS, AngularJS, NodeJS) stack to develop a fullstack application. The user can create an account and build multiple boards. Each board can contain many lists with items. The user can also make changes or remove any of the boards, lists, and items.

EGGERCISE

SEP. 2015 - CURRENT

Eggercise is an exercise tracking/betting app where users can create groups and compete with other users involving a pool of money. That pool of money goes to the user that exercises the most within the group.

I created most of the app's basic functionality(i.e. deleting, editing, and showing data). I also wrote media queries for the app to appear responsive on different devices.

EDUCATION

LEARNTech LABS

SEP. 2015 - CURRENT

LearnTech Labs teaches modern web and app development alongside computer science fundamentals. Students code over 1,500 hours during the program to gain their applied experience while working on projects provided by industry developers. By combining the applied coding skills and including the computer science fundamentals as the theoretical knowledge backing their coding work; LTL Junior developers come out with a more rounded skill set that allows them to dive into industry work with class.
